

APPLICATION

GOLDEN REFERENCE

V2

Authoritative Product, Capability, Current-Reality & Governance Reference

GOLDEN B · Application product reference · Classic institutional presentation

Document control	Value
Classification	Authoritative Golden Reference
Content authority	Sealed Application Golden V2 source package
Source seal	ELISENCE_APPLICATION_GOLDEN_V2_SOURCE_VERIFIED_AND_FINAL_SEALED
Scope	ELISENCE Application product surfaces & capabilities
Publication	Classic document production V1
ELIS Golden	Quarantined - integration boundary only
Prior Application V1	INVALID_FOR_APPLICATION_GOLDEN_FINALITY - not used

Document Control

This PDF is a classic presentation rendering of the independently verified and finally sealed ELISENCE Application Golden Reference V2 source package. Formatting is presentation-only. Product truth, surface scope, capability scope, maturity, regressions, limitations, and Two-Golden boundaries are unchanged.

Locked census	Count
Application surfaces	41
Application capabilities	43
Operator-validated working	11
Current regressions	2
Non-roadmap Application items	53
Recovered surfaces	12
BBVP as Application capability	0

At-a-glance maturity law

Not all 41 surfaces are equally mature. Preserve distinct classes: CURRENT_OPERATIONAL · OPERATOR_VALIDATED · CURRENT_PARTIAL · CURRENT_REGRESSION · UI_FOUNDATION · AUTHORITY_GATED · BUILT_NOT_CONNECTED · NO_LIVE_RUNTIME · HISTORICALLY_PROVEN_CURRENT_UNKNOWN · and related evidence-backed states.

Two-Golden boundary

GOLDEN A = ELIS / ELISA (intelligence architecture). GOLDEN B = ELISENCE APPLICATION (this document). ELIS atlases and BBVP doctrine are not Application-owned content. BBVP Application capability count = 0.

Field	Value
Application surfaces	**41**
Application capabilities	**43**
Operator-validated working	**11**
Current regressions	**2**
Non-roadmap Application items	**53**
Recovered surfaces (prior gaps)	**12**
BBVP as Application capability	**0**
PDF	NOT CREATED (this mission)

This Golden is not: an ELIS architecture duplicate; a BBVP doctrine document; a bug dump; a roadmap; a marketing brochure; the invalid V1 Application Golden.

This Golden does not: import 55/78/60/156/541 atlases; count BBVP as an Application capability; repair Voice/Messaging; mutate runtime/iOS/Android/backend; modify ELIS Golden or V1.

PART I - ELISENCE APPLICATION ORIENTATION

1. Canonical definition

ELISENCE Application is the user-facing ELISENCE multi-domain platform through which identity, security, social and media, communication, health and wellness, sensors, medical and professional surfaces, appointments and Family Doctor concepts, documents/vault/attachments, family profiles, personal dashboard/governance, Country OS informational readiness, achievements/rewards/eligibility, SOS support, and intelligence-assisted entry points (including Elisa/Voice within boundaries) are exposed to users.

It is not reducible to: an AI assistant alone; a health tracker alone; a social network alone; a medical app alone; or a collection of screens.

2. Two-Golden isolation law

Product	Purpose
GOLDEN A - ELIS / ELISA	Intelligence architecture (systems/engines/algorithms/modules, authority/SoT, MI architecture depth, BBVP doctrine, provenance)
GOLDEN B - ELISENCE APPLICATION (this document)	Product surfaces, user journeys, operational maturity, regressions, platform relationships, non-roadmap product capabilities

ELIS ≠ APPLICATION · ELISA ≠ APPLICATION · APPLICATION ≠ ELIS · ELIS CAPABILITY ≠ APPLICATION CAPABILITY.

ELIS/Elisa appear here only to explain application integration. Complete ELIS atlases remain in the ELIS Golden and are not imported.

3. Application at a glance

Census	Value	Note
Surfaces	41	Includes 12 recovered surfaces; not the invalid V1 count of 29
Capabilities	43	Application-owned/facing; BBVP excluded
Operator-validated working	11	Physical-device validation set
Regressions	2	Voice; Messaging peer identity/avatar
Non-roadmap items	53	ROADMAP ABSENCE ≠ CAPABILITY ABSENCE

4. Current-reality maturity law

Preserve distinct classes: CURRENT_OPERATIONAL · OPERATOR_VALIDATED · CURRENT_PARTIAL · CURRENT_REGRESSION · UI_FOUNDATION · UI_ONLY · BACKEND_READY_CLIENT_NOT_WIRED · AUTHORITY_GATED · DOCUMENTED_CURRENT_DEPTH_UNKNOWN · READY · REQUIRES_DEVICE · COMING_SOON · FUTURE · UNKNOWN · HISTORICALLY_PROVEN_CURRENT_UNKNOWN · NO_LIVE_RUNTIME.

Do not flatten maturity. Application maturity is not ELIS engineering maturity.

5. Locked operator-validated working set (11)

Capability	Status	Maturity
PHOTO_POSTING	WORKING	CURRENT_WRITE_PERSISTENCE_PROVEN
VIDEO_POSTING	WORKING	CURRENT_WRITE_PERSISTENCE_PROVEN
VIDEO_PLAYBACK	WORKING	CURRENT_RUNTIME_PROVEN
PULSE_POSTING	WORKING	CURRENT_WRITE_PERSISTENCE_PROVEN
WAVE	WORKING	CURRENT_RUNTIME_PROVEN
PASS	WORKING	CURRENT_RUNTIME_PROVEN
SPARK	WORKING	CURRENT_RUNTIME_PROVEN
LOGIN	WORKING	CURRENT_RUNTIME_PROVEN
SECURITY_CORE	WORKING	CURRENT_RUNTIME_PROVEN
AVATAR_UPLOAD	WORKING	CURRENT_WRITE_PERSISTENCE_PROVEN
BIO_EDIT_SAVE	WORKING	CURRENT_WRITE_PERSISTENCE_PROVEN

Evidence class: OPERATOR_REPORTED_CURRENT_EVIDENCE (not upgraded). Do not downgrade for roadmap absence.

6. Twelve recovered surfaces (mandatory)

These were omitted or under-scoped in the invalid V1 census and are first-class in V2:

Surface	Current state (refoundation)
SOS	HISTORICALLY_PROVEN_CURRENT_UNKNOWN
MY_CHANNEL	HISTORICALLY_PROVEN_CURRENT_UNKNOWN
SENSORS	DOCUMENTED_CURRENT_DEPTH_UNKNOWN
NUTRITION	HISTORICALLY_PROVEN_CURRENT_UNKNOWN
PRESENCE	NO_LIVE_RUNTIME
PERSONAL_DASHBOARD	DOCUMENTED_CURRENT_DEPTH_UNKNOWN
COUNTRY_OS	DOCUMENTED_CURRENT_DEPTH_UNKNOWN
FAMILY_DOCTOR	DOCUMENTED_CURRENT_DEPTH_UNKNOWN
PROFESSIONAL_GATEWAY	UI_SHELL_AUTHORITY_GATED
FAMILY_PROFILES	DOCUMENTED_CURRENT_DEPTH_UNKNOWN
SEARCH	DOCUMENTED_CURRENT_DEPTH_UNKNOWN
ATTACHMENTS	FRAGMENTED_CURRENT_PARTIAL

PART II - IDENTITY, PROFILE & SECURITY

7. Profile & identity

Surfaces: PROFILE, AVATAR_UPLOAD, BIO_EDITING.

- AVATAR UPLOAD = WORKING / CURRENT_WRITE_PERSISTENCE_PROVEN
- BIO EDIT/SAVE = WORKING / CURRENT_WRITE_PERSISTENCE_PROVEN

Covered: profile; identity presentation; avatar; bio; public vs account identity; profile media; family-profile relationship; professional identity boundary.

PROFILE DISPLAY ≠ IDENTITY AUTHORITY ≠ PROFESSIONAL VERIFICATION.

PROFILE beyond avatar/bio writes: HISTORICALLY_PROVEN_CURRENT_UNKNOWN.

8. Security

Login / security core: WORKING. Register: LOGIN = CURRENT_RUNTIME_PROVEN (operator: security/login works strongly).

Security Center / 2FA / biometrics: HISTORICALLY_PROVEN_CURRENT_UNKNOWN - UI may exist; backend enforcement not inferred from UI alone.

Where evidenced: Login; Security Center; sessions/devices; security alerts; password change; Face ID/biometrics; 2FA; email verification; trusted-device foundation; risk/protection state; sign out.

AUTHENTICATED ≠ AUTHORISED. UI ≠ backend enforcement. Credentials, tokens, and TOTP secrets are never published in this Golden.

PART III - SOCIAL, CONNECTIONS & COMMUNICATION

9. Home & principal navigation

HOME is the primary entry composition (HISTORICALLY_PROVEN_CURRENT_UNKNOWN). It integrates (where evidenced) health, social/media, Elisa, appointments, sensors, progress, and other domains.

Phases / journey navigation may appear as product organization. Individual phase entries are not equally mature - classify per evidence. This Golden does not invent a separate Phases surface ID beyond Home/navigation structure unless refoundation enumerated one (it did not as a distinct APP-SURF beyond Home).

10. Connections & Search

Connections and Search are separate recovered/explicit surfaces.

- CONNECTIONS: HISTORICALLY_PROVEN_CURRENT_UNKNOWN
- SEARCH: DOCUMENTED_CURRENT_DEPTH_UNKNOWN (recovered)

Evidence-supported concepts: Connections Home; connection graph-facing UI; requests; pending requests; professional invites; family/care access; contact invitation; QR/invite concepts; public Elisence identity/username discovery.

Privacy contract where evidenced: email and phone search are not supported.

Peer display-name/avatar enrichment on Connections/Messaging is a presentation/projection regression, not subsystem absence.

11. Messaging, Voice, Presence, Call shells

Aspect	Locked status
Messaging core (text rooms)	CURRENT_OPERATIONAL_WITH_LIMITATION - NOT globally broken
Peer identity	CURRENT_REGRESSION
Peer avatar	CURRENT_REGRESSION
Voice	CURRENT_REGRESSION / ESTABLISHED_CAPABILITY_WITH_CURRENT_REPAIR_REQUIRED
Presence	NO_LIVE_RUNTIME (recovered surface)
Call shells	PREVIEW / SHELL / NOT CONNECTED

PRESENCE UI ≠ LIVE PRESENCE RUNTIME. CALL SHELL ≠ LIVE CALL. VOICE REGRESSION ≠ NOT IMPLEMENTED.

Do not describe Messaging as globally broken.

PART IV - MEDIA, PULSE & INTERACTION

12. Social / media platform

Operator-validated working: photo posting; video posting; video playback; Pulse posting.

Also: Wave, Pass, Spark (WORKING / CURRENT_RUNTIME_PROVEN) - non-roadmap product capabilities that must not disappear for roadmap thinness.

My Channel (recovered): HISTORICALLY_PROVEN_CURRENT_UNKNOWN. Distinct from Pulse; feed wiring depth unknown where so stated.

Media/profile relationship and social projection at documented maturity only. Do not invent unsupported social features.

PART V - HEALTH, WELLNESS & SENSORS

13. Health & wellness

Application-facing where supported: Weight; Hydration; Nutrition (explicit recovered surface); Meals; Activity; Sleep/Recovery; Wellness; Goals; Trends; Progress; Daily Pattern Intelligence.

- WEIGHT: HISTORICALLY_PROVEN_CURRENT_UNKNOWN
- HYDRATION: HISTORICALLY_PROVEN_CURRENT_UNKNOWN
- NUTRITION: HISTORICALLY_PROVEN_CURRENT_UNKNOWN (recovered)

TRACKING ≠ DIAGNOSIS · TREND ≠ DIAGNOSIS · INFERENCE ≠ DIRECT MEASUREMENT.

14. Sensors (recovered explicit surface)

SENSORS current state: DOCUMENTED_CURRENT_DEPTH_UNKNOWN.

Labels where evidenced: Apple Health, Apple Watch, Heart Rate, ECG, Blood Oxygen, Respiratory Rate, Wrist Temperature, Sleep, Activity & Steps, Mobility, Glucose, Environment, Fall & Safety, Mindfulness, Wearables.

Maturity labels READY / REQUIRES DEVICE / COMING SOON / FUTURE are labels, not device/runtime proof.

15. Predictive / Respective Health

Field	Value
UI_BUILT	YES
BACKEND_BUILT	YES
UI_BACKEND_WIRING	NOT_YET
CURRENT_STATE	BACKEND_READY_CLIENT_NOT_WIRED

Not NOT_IMPLEMENTED. Not CONNECTED_RUNTIME. Alias wording: BUILT_NOT_CONNECTED.

PART VI - MEDICAL INTELLIGENCE & PROFESSIONAL SURFACES

16. Medication / MI application exposure

Medication intelligence read: DISTINCT_READ_SIDE_PRESERVE Prescription write: AUTHORITY_GATED_CURRENT_UNPROVEN

Application/documentary components (from refoundation MI register):

Component	Status
medicine catalogue	READ_SIDE_DISTINCT - do not erase
NHS dm+d identity	DOCUMENTARY/READ - current depth UNKNOWN
AMP/VMP/VMPP / pack / manufacturer / SSP	DOCUMENTARY_IDENTITY_MODEL - current UNKNOWN
medicine search / global medication identity	READ_SIDE_CANDIDATE
dose UI	UI_POSSIBLE ≠ PRESCRIPTION_WRITE
prescription draft	DRAFT ≠ ISSUED
prescriber authority	AUTHORITY_GATED
pharmacy authority	AUTHORITY_GATED
send to pharmacy / patient / both	LOCKED_OR_GATED ≠ ABSENT_CATALOGUE

Where supported: medicine search; global medicine identity; NHS dm+d; AMP; VMP; VMPP; pack options; manufacturer/supplier; SSP evidence; dose UI; prescription draft; patient medication request; pharmacy relationship; send-to-patient/pharmacy/both boundaries.

17. Professional Gateway (recovered)

PROFESSIONAL_GATEWAY: UI_SHELL_AUTHORITY_GATED.

Doctor Workspace appears as application-facing capability under professional/MI exposure. PROFESSIONAL UI ≠ PROFESSIONAL AUTHORITY.

Laws: CATALOGUE READ ≠ PRESCRIBING · DOSE UI ≠ PRESCRIPTION AUTHORITY · DRAFT ≠ ISSUED · LOCKED SEND ≠ BROKEN SEND.

Architecture depth for catalogue systems lives primarily in the ELIS Golden; this document covers application exposure only.

PART VII - APPOINTMENTS & FAMILY DOCTOR

18. Appointments

Aspect	Status
Patient appointment	DOCUMENTED_WITH_UNKNOWN_CURRENT_DEPTH
Professional / organisation appointment	UI_SHELL_AUTHORITY_GATED

Laws: REQUEST ≠ CONFIRMED · PATIENT REQUEST ≠ PROVIDER AUTHORITY · PROFESSIONAL UI ≠ PROFESSIONAL WRITE AUTHORITY.

19. Family Doctor (recovered explicit surface)

FAMILY_DOCTOR: DOCUMENTED_CURRENT_DEPTH_UNKNOWN.

Family Doctor is a first-class Application surface in V2 (refoundation recovery). It is product-facing via care/appointment/professional shells at documented maturity - not an invented ELIS subsystem and not erased into prose-only discoverability.

PART VIII - DOCUMENTS, ATTACHMENTS & FAMILY PROFILES

20. Documents / Private Vault

DOCUMENTS_PRIVATE_VAULT: CURRENT_PARTIAL / lock CURRENT_PARTIAL_IOS_EVIDENCED.

21. Attachments (recovered explicit surface)

ATTACHMENTS: FRAGMENTED_CURRENT_PARTIAL / architecture
FRAGMENTED_CURRENT_PARTIAL_UNDER_CLASSIFIED_DOCUMENTARY.

Where evidenced: document storage; attachment association; medical documents; messaging relationship; privacy/security; export relationship. Ownership split across iOS vault store, medical documents, chat save, and Export governance. Do not claim universal finished cross-platform vault.

22. Family Profiles (recovered explicit surface)

FAMILY_PROFILES: DOCUMENTED_CURRENT_DEPTH_UNKNOWN.

Evidence-supported fields: relationship, name, DOB, sex_at_birth, gender_display, units, height, weight, targets, activity, conditions, medications, allergies, profile_switching.

FAMILY PROFILE ≠ SEPARATE LOGIN ≠ INDEPENDENT ACCOUNT. Preserve device-local vs server-sync truth exactly; do not claim full server sync without proof.

PART IX - PERSONAL DASHBOARD, GOVERNANCE & COUNTRY OS

23. Personal Dashboard (recovered)

PERSONAL_DASHBOARD: DOCUMENTED_CURRENT_DEPTH_UNKNOWN.

Surfaces may include: Identity & Passport; Trust & Access; Privacy Matrix; Profiles & Family Governance; Country OS Governance Validation; Global Readiness & Protection; Identity Foundation; Eligibility Evaluation.

Distinguish informational / read-only / runtime-backed / authority-enforced. Informational governance ≠ enforcement.

24. Country OS (recovered)

COUNTRY_OS: DOCUMENTED_CURRENT_DEPTH_UNKNOWN.

Laws: INFORMATIONAL ONLY · NOT AUTHORIZATION AUTHORITY · NOT ENFORCEMENT · REGULATORY REFERENCE ≠ REGULATORY CERTIFICATION.

Example families (postures, not certifications): EU_MDR, GCC, UK_NHS, US_FDA, TURKEY, INDIA_FUTURE_OPTIONAL, IRAN_DORMANT_PREPARED, UNKNOWN_GLOBAL.

READINESS ≠ REGULATORY APPROVAL.

PART X - ACHIEVEMENTS, REWARDS, ELIGIBILITY & SOS

25. Achievements / Rewards / Eligibility

ACHIEVEMENTS surface: HISTORICALLY_PROVEN_CURRENT_UNKNOWN. Rewards and Eligibility are Application capabilities in the 43-capability register.

ACHIEVEMENT ≠ REWARD · ELIGIBILITY ≠ COMPETITIVE SCORE. Do not invent public badge projection.

26. SOS (recovered explicit surface)

SOS: HISTORICALLY_PROVEN_CURRENT_UNKNOWN. Non-roadmap inclusion preserved (APP-NR / CR-NR-004 lineage).

This Golden does not invent emergency dispatch, ambulance integration, clinical emergency authority, external responder connection, or location dispatch unless separately proven (not proven here).

PART XI - ELIS / ELISA INTEGRATION

27. Integration boundary

ELIS provides intelligence architecture. Elisa is a user-facing intelligent manifestation/interface inside the Application within defined boundaries. The Application exposes and consumes ELIS capabilities.

Application surface	ELIS/Elisa role	Maturity
VOICE	Elisa/Voice capability manifestation	CURRENT_REGRESSION
ELISA	Human-facing assistant inside app	HISTORICALLY_PROVEN_CURRENT_UNKNOWN
MEDICAL_INTELLIGENCE	Architecture depth in ELIS Golden; app exposes surfaces	READ_PRESERVE / WRITE_GATED
PREDICTIVE_HEALTH_INTELLIGENCE	Backend components may exist in intelligence stack	BACKEND_READY_CLIENT_NOT_WIRED
EXPORT	Export Governance family adjacency (ELIS-FAM-014)	HISTORICALLY_PROVEN_CURRENT_UNKNOWN

ELISA ≠ SOURCE OF TRUTH · ≠ CLINICAL AUTHORITY · ≠ UNLIMITED AUTONOMOUS EXECUTION.

Forbidden here: importing ELIS 55-system / 78-engine / 60-algorithm / 156-module / 541-capability atlases as Application-owned content; counting BBVP as an Application capability.

PART XII - PLATFORM PARITY & CURRENT REALITY

28. Platform parity

Overall: UNKNOWN.

[‘This mission did not execute cross-platform device matrix’, ‘iOS source/evidence denser in workspace forensics’, ‘Classify per capability later: PARITY_PROVEN / IOS_AHEAD / etc. only with evidence’]

Allowed classes: PARITY_PROVEN, FUNCTIONALLY_EQUIVALENT, UI_DIFFERENT_RUNTIME_SHARED, IOS_AHEAD, ANDROID_AHEAD, BACKEND_READY_CLIENT_NOT_WIRED, CLIENT_READY_BACKEND_NOT_WIRED, UNKNOWN. Universal parity claims are forbidden.

29. Current limitations (proportionate)

ID	Item	Status
LIM-001	Voice	CURRENT_REGRESSION / ESTABLISHED_WITH_REPAIR_REQUIRED
LIM-002	Messaging peer identity/avatar	CURRENT_REGRESSION (core operational with limitation)
LIM-003	Presence	NO_LIVE_RUNTIME
LIM-004	Call shells	UI_FOUNDATION_PREVIEW_NOT_CONNECTED
LIM-005	Predictive Health	BUILT_NOT_CONNECTED / BACKEND_READY_CLIENT_NOT_WIRED
LIM-006	Documents/Private Vault	CURRENT_PARTIAL_IOS_EVIDENCED
LIM-007	Attachment architecture	FRAGMENTED_CURRENT_PARTIAL_UNDER_CLASSIFIED_DOCUMENTARY
LIM-008	Prescription write	AUTHORITY_GATED_CURRENT_UNPROVEN
LIM-009	Professional appointments	UI_SHELL_AUTHORITY_GATED
LIM-010	Whole-app 8-language completion	NOT_PROVEN

This section is truthful and subordinate - the Golden is a product reference, not a defect report.

30. Non-roadmap Application capabilities (53)

ROADMAP ABSENCE ≠ CAPABILITY ABSENCE. All 53 non-roadmap Application inclusion items are retained in 05_APPLICATION_GOLDEN_V2_NON_ROADMAP_REGISTER.json. Highlights include Wave, Pass, Spark, SOS, My Channel, Documents/Private Vault, Predictive Health Intelligence, and other operational/documentary Application capabilities.

PART XIII - TECHNICAL APPLICATION REFERENCE

31. Surface master (41/41)

ID	Name	Domain	Current state	Recovered
