ELISENCE

Connecting Health, Wellbeing & Life.

For people and families.
For healthcare and institutions.

Two Problems. One Connected Vision.

01

Fragmented Everyday Life

Health records, meal logs, messages and appointments often live in different places. People and families are left to keep track across apps and services.

02

Fragmented Continuity of Care

After a hospital visit, people still need to manage medication changes, daily observations, follow-up appointments and family support.

Care Does Not End at Discharge. Life Continues.

What Is ELISENCE?

An AI-powered ecosystem for health, wellbeing and human connection.

01

Everyday life

Stay connected with family and community. Keep routines such as nutrition and weight in view.

02

Personal health

Organise measurements, medication information and personal health history over time.

03

Professional care

Prepare for appointments and explore authorised ways to support follow-up with care teams.

ELISA helps people navigate supported services across the ecosystem.

One Ecosystem. Two Connected Worlds.

For people & families. For healthcare & institutions.

People & Families

Everyday wellbeing and human connection

Nutrition, weight and diabetes tracking

Women and Women+

ELISA, medication and care navigation

Institutions & Organisations

Hospitals and healthcare professionals

Governments and public health

Universities, pharma and life sciences

Insurers, employers and enterprises

ELISENCE / SHARED ECOSYSTEM

Health information moves only with authorisation for a defined purpose.

What We Have Built

In-house technology across everyday life, health and care.

FOOD PHOTO WORKFLOW

Tested on a physical device

Recognise → Review → Accept → Save → Reload

Social & everyday health

Connections, messaging, meal diary, weight and hydration.

Women and Women+

Distinct programmes with substantial implemented and tested functionality. App integration is in progress.

Care & ELISA

Appointment requests, medication reference and implemented ELISA conversation and navigation.

Meet ELISA

ELISA helps people understand supported information and find their next step.

ILLUSTRATIVE CONVERSATION

“Help me prepare for my follow-up.”

ELISA

“Let’s list the changes you noticed and the questions you want to ask.”

UNDERSTAND

Explain supported information in everyday language.

NAVIGATE

Find relevant tools and care-related services.

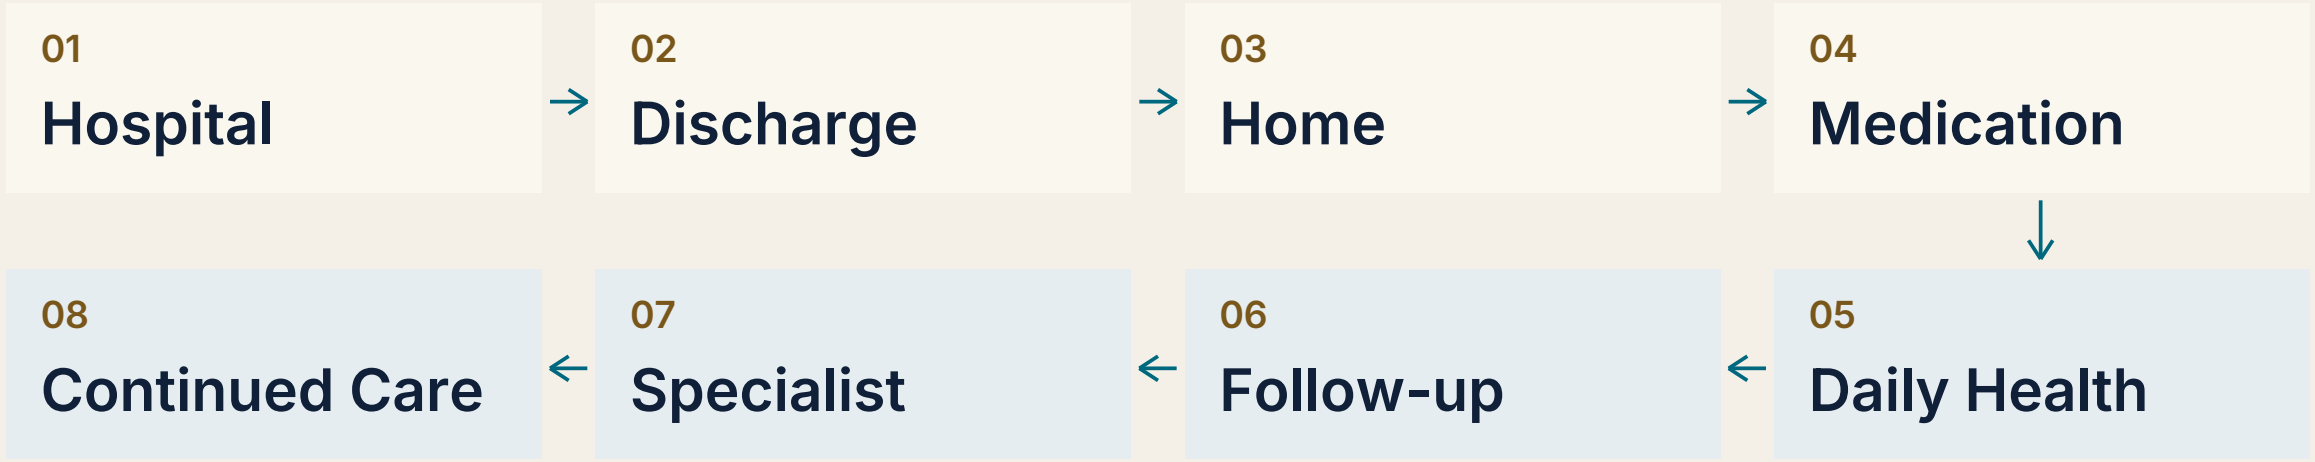

PREPARE

Organise observations and questions for a visit.

Healthcare professionals retain diagnosis, prescribing and treatment decisions.

One Continuous Health Journey

A hospital-to-home example of how continuity could work.

DEMONSTRATED COMPONENTS

People can record everyday observations and use appointment request workflows.

PROPOSED INSTITUTIONAL WORKFLOW

Care teams could review agreed information through authorised interfaces after the workflow is validated.

Why It Matters for People and Institutions

For People

Keep daily life in view

Bring routines, observations and personal health history together.

Prepare for care

Find relevant services and bring clearer questions to appointments.

Stay connected

Keep family and community part of everyday wellbeing.

For Institutions

Coordinate follow-up

Explore more consistent handoffs and ways to engage patients.

Support research

Define what to measure and how authorised information could be used.

Test resource use

Measure repeated data entry, staff time and costs during a pilot.

Example pilot measures: follow-up completion, repeated data entry and staff time.

Built In-House. Designed for Collaboration.

Founder-led engineering for a multilingual, modular ecosystem.

WE HAVE.	Selected interfaces support eight languages, including right-to-left layouts for Persian and Arabic.
WE CAN.	Scope pilots and research with partners. Agree what to measure and who can access each piece of information.
WE BUILD.	Develop integrations in-house. Identity, permissions and purpose govern access in the design.

Collaboration can include software licensing, scoped pilots and joint research.

Meet ELISENCE at Web Summit

Let’s Connect Care With Life.

Explore ELISENCE as a person or family. Talk with us about a care workflow, a research question or a partnership.
